

Operating System Information, Installation and Settings

Task 1: Windows System Information

Item	Value
OS Name	Microsoft Windows 10 Pro
Version	10.0.19042 Build 19042
Other OS Description	Not Available
OS Manufacturer	Microsoft Corporation
System Name	DESKTOP-J0S4R3G
System Manufacturer	DIGILITE
System Model	DL-H61MXP
System Type	x64-based PC
System SKU	To be filled by O.E.M.
Processor	Intel(R) Core(TM) i3-2120 CPU @ 3.30GHz, 3300 Mhz, 2 Core(s), 4 Logical Pro...
BIOS Version/Date	American Megatrends Inc. C36DLS05, 2/26/2013
SMBIOS Version	2.7
Embedded Controller Version	255.255
BIOS Mode	Legacy
BaseBoard Manufacturer	DIGILITE
BaseBoard Product	DL-H61MXP
BaseBoard Version	
Platform Role	Desktop
Secure Boot State	Unsupported
PCR7 Configuration	Binding Not Possible
Windows Directory	C:\WINDOWS
System Directory	C:\WINDOWS\system32
Boot Device	\Device\HarddiskVolume1
Locale	United States
Hardware Abstraction Layer	Version = "10.0.19041.488"
User Name	DESKTOP-J0S4R3G\TopsBR-11
Time Zone	Pacific Daylight Time
Installed Physical Memory (RAM)	8.00 GB
Total Physical Memory	7.71 GB

Description: I opened the System Information tool on my Windows PC and checked the operating system version, processor and installed RAM details.

Creating a Linux Bootable USB

Step 1- download Linux ISO

I selected ubuntu Linux and downloaded the official ISO file for the installation

Step 2- prepare the USB drive

I connected a spare USB drive to the computer and opened rufus.

step –3 select the iso file

In rufus i selected the USB drive and chose the downloaded ubuntu ISO file.

Step 4- create bootable USB

i started the process and waited for rufus to create the bootable USB drive.

Step 5- verify the USB

After the process finished i checked that USB drive was to boot the ubuntu installer.

Result:

The ubuntu ISO was successfully prepared as a bootable ISB installation drive.

Adjusting macOS Settings

Step 1 – Change Wallpaper

I opened the wallpaper settings on macOS and selected a different desktop wallpaper.

Step 2 – Open Language Settings

I opened System Preferences → Language & Region to change the system language.

Step 3 – Add a Language

I added Gujarati as the preferred language and applied the language setting.

Step 4 – Verify the Changes

I checked the desktop and language settings to confirm that the changes were applied successfully.

Result:

The desktop wallpaper was changed, and

the language setting was updated
successfully.

Ubuntu Installation and User Account

Step 1- install ubuntu

I installed ubuntu Linux on the computer using a virtual machine.

Step 2- Create a New User

During the setup, I created a new user account with the username gamer.

Step 3 – Enable Automatic Login

I opened the user settings and enabled automatic login for the gamer account.

Step 4 – Restart the System

I restarted the Ubuntu system to check whether the new settings were working correctly.

Step 5 – Verify the Username

I checked the login screen and confirmed that the gamer username was displayed.

Result:

The Ubuntu installation was completed, and the **gamer** user account was created with automatic login enabled.

Task 5: Windows 10 Installation Guide

Step 1 – Prepare the Installation Media

I would prepare a Windows 10 installation USB and make sure the laptop meets the basic requirements.

Step 2 – Start Windows Setup

I would boot the laptop from the Windows installation USB and start the Windows setup.

Step 3 – Select Installation Type

I would select Custom: Install Windows only when a fresh installation is required.

Step 4 – Partition the Drive

I would carefully select the correct drive and

partition for Windows. Before deleting or formatting any partition, I would make sure important data is backed up.

Step 5 – Complete the Installation

I would follow the on-screen instructions and wait for Windows to finish installing.

Step 6 – Privacy Settings

After installation, I would review the privacy settings and disable unnecessary permissions according to my needs.

Step 7 – Install Updates

Finally, I would open Windows Update and install the available updates and required drivers.

My Observation:

The installation steps were mostly clear. The partitioning step needs extra attention because selecting or formatting the wrong partition can cause data loss. I would also

check the official Microsoft instructions if I
was unsure about any installation option.
